

Measuring your windows for Fly Screens

What to measure and how to measure it

Measuring your windows for Easy Fly Screens is... well.. Easy!

Just follow these simple instructions:

1. Please take all measurements in centimetres
2. Make sure you have a flat frame of at least 2cm on both sides of the window as well as at the top and bottom.
3. We simply require two measurements (height and width) which you can input on the website to make your purchase.

Width = The full width of the window including the static frame on both sides in centimetres

Height = The full height of the window including the static frame top and bottom in centimetres

Jot your window sizes down below. Select the sizes from the drop down lists on the website.

Window	Window Width (cm)	Window Height (cm)
1		
2		
3		
4		
5		

Remember at least one of the height or width must be no more than 174cm due to the width of roll we use, there is no restriction on the other dimension.

Easy Fly Screens

Custom made, easy to fit, easy to remove and fast delivery
37 Pinfold Lane, Ruskington, Sleaford, Lincolnshire NG34 9EU
